

# E-MAX CAD - Extra Special Offer Extended A Further Two Months

We are extending our promotion on E-Max CAD for a further two months. So far it has proven a great success with some excellent restorations fitted.

## Around 10% Stronger

E-Max CAD offers all of the same features as conventionally pressed E-Max but also several improvements. The benefits of E-Max CAD include the fact that it is around 10% stronger than pressed, better accuracy of fit due to milling as opposed to pressing and it comes with a 5 year written guarantee.

## Milled by Straumann

That is not all, the milling will be done by Straumann in their industrial level milling machines. Whilst the benefits of E-Max CAD are largely universal not all milling machines are made the same or provide the same level of accuracy. We only provide E-Max CAD that has been milled by Straumann and comes with their 5 year written guarantee.

## 5 Year Written Guarantee

To sum up we are offering a premium product with many advantages over similar restorations at an excellent price. Why not take advantage of this offer and see how good E-Max CAD is today?

## Premium Product
