

Maurice Hood Dental Laboratory Ltd

Gingival Shading

In the first of our series of product updates we look at the Enigma ColorTone® System for life-like replication of your patient's natural gingival colouring. Too often this is a part of the denture that is overlooked with the gum work crying out false teeth even on the best of dentures. More and more patients are demanding high quality, undetectable dentures. From the pictures on this newsletter you can clearly see the difference gum staining makes in the mouth. Even on a full denture ColorTone® gum shading can make a huge difference to the appearance and the confidence of the patient when wearing the denture.

The process takes no surgery time, other than possibly for shade taking, and is permanent. The colours are applied in thin layers during the packing stage using a special, permanent, heat cured acrylic.

We offer a range of options and costs from just using one or two colours all the way to making detailed custom shade tabs to ensure accurate colour matching. Our top of the range 'Ultimate' dentures even have ColorTone® shading included in the price.

There are also a number of options to keep costs down including patients coming to the laboratory for detailed shade taking or the use of inter-oral photographs to enable colour matching, rather than the more expensive option of a technician coming to the surgery, although even that is included with 'Ultimate' dentures.

A typical normal denture, made in standard acrylic which can look obvious in the mouth.

A private denture with naturally shaded gum. As you can see, the denture looks natural and disappears. Pictures supplied by Schottlander

We can even supply various patient and surgery information leaflets, brochures and demonstration pieces free of charge. Some of which can be tailored to your own practice and needs.

If you would like further information about the system or anything else please let us know.

Free Trial

To prove to you the benefits of ColorTone® we will happily do one case of your choice free of charge, excluding technician time if you require a surgery visit.

Free Demonstration Pieces

We have now sent out the first batch of demonstration pieces of denture work, which includes a private version with ColorTone® shading. We are also sending with the demonstration sets various selling aids including patient information leaflets and DVD's, some of which can be individually personalised for your practice. We can still supply them free of charge at the moment so if you would like to receive a set please let us know.
